

### Which is more complicated?

- A. Mount Rushmore
- B. A 747 airliner
- C. An iPod
- D. A worm

Ask any scientist which one out of those four is the most intricately designed and they will always tell you the worm. If Mount Rushmore had a designer, if the 747 had a designer, if the iPod has a creator and designer, but the worm happened by chance over time? What? That doesn't make sense. If the first three things had a creator and a designer then the worm would have to have a greater creator and designer than the others could ever dream of having.

The sun, the moon, the stars, the ocean, the sand, your DNA - 3 Billion pieces different than mine. If there was a creator for the worm then there must be a creator of this universe.
