1500M	3:11.91	Howard Ganong	USA/Northern New York	Bay City	16/03/2001

The times listed here have been sourced from the national age records of ISU members from Australia, United States, Canada, Scotland and England and do not necessarily represent the fastest world times for these age groups.

Some Scottish and British records may challenge the above times but due to different age brackets, it has not been possible to confirm the skater's exact age at the time of their national record. If any skater was within the said bracket at the time of their record, I will be happy to update it.

This list is compiled purely for fun comparative purposes.
