

Traxsys Input Products Repair Service

Do you have a broken or faulty Roller II or Roller Plus joystick or trackerball, 4Talk4 or Scan4 communication device, EasiTrax or Joggle Switch?

We can help.

Send us your Traxsys equipment if it:

- no longer works reliably
- has poor sound quality
- no longer scans
- has a damaged cable
- centre off-set

Send it to Excitim for repair.

Excitim offers a repair service for all Traxsys assistive technology products (previously Penny & Giles or Esterline) supported by engineers at Traxsys Input Products. Send us your broken or faulty equipment and within three days we will email you a detailed quotation listing the work and parts needed to restore your Traxsys products to an “as-new” condition.

Give Mike a call on 08707 117153 to learn more or text 07786 364115 to arrange a call back.
