Approximate translation of the review

A discovery of this new **ALIVE INC**, my blood has a beat! And new compositions of these talented French on CD, entitled **669** (neighbor of the third Devil?). Well, when you read my column first album, you will understand my enthusiasm slipping this dynamic cake in the drive.

At the same time, revealing the cover, I found myself all worried, musicians are now appointing **Tyler**, guitars, vocals, **Dusk**, bass and vocals, **Ian**, drums.

Well, for international career is a wise choice. And music side, without denying a second her

respective talents, style fused the trio has evolved into a metal inventive eye to the Hardcore, heavy on the Punk, Death with the base Hard-Rock. (A cat did not regain its small!)

ALIVE INC is a molten lava and reminds me sometimes on this new opus of our friends Chambéry **THIRD EYED MACHINE**.

Okay, you've got a small ultra powerful bomb played by outstanding musicians.

I have no musical background in these styles, nor am I a big fan but when the connection is great, I must say.

Car **ALIVE INC** has not forgotten that a good song starts with a beautiful melody!

So, by choice, I'm a fan of the previous installment but this one is of the same ilk in terms of qualifications.

Bravo, bravo, bravo thousand times in this training proves she is more able to transform a hit to pop obsolete (*Sowing The Seeds Of Love* of **TEARS FOR FEARS**) as a demonic metal.

Respect, this training does not inspire me that our three merry lads are on top and will stay a while. Come join

and **ALIVE INC** participate in their consecration.

And if you want to tickle Headbanger ankles, go to meet the band on stage ...

last slap, sound mixing and production are up to the point.

also stressed the incredible instrumental *Electric Thoughts* which shows that **Tyler** is a "guitar-hero" among the best.

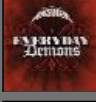

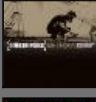

Okay, I stop, off you go buy this album ...
