

open your blogspot account/go to the dashboard

layout>edit html>edit template>click:expand widget templates
pay attention to #<number>

#1 get rid of the menu bar
-find "blogger template style"
-copy & paste the codes right after "---"

```
#navbar-iframe {  
  height: 0px;  
  visibility: hidden;  
  display: none;  
}
```

#2 get rid of the boxed header
-find "#header-wrapper {"
-delete "border: 1px solid \$bordercolor;"
-find "#header {"
-delete "border: 1px solid \$bordercolor;" + same as the last deletion
-fyi: the 1px=thickness of the border, solid=type of the border (dotted, dashed etc), \$bordercolor=color of the border

#3 insert image for header
-find "#header {"
-copy & paste the codes right before the closed tag '}'

background: transparent url(http://www.) no-repeat center;

```
-find "#header-wrapper {"  
-change width to 'better bigger than original supposed image' eg: 800px for 750px  
-add "height:130px;" under width's verse + supposed image size  
-find "header-inner {"  
-add "height:130px;" under "background-position: center;"  
-find "header .description {"  
-change "max-width:800px;"
```

#4 get rid of page title
-find "#header h1 {"
-copy & paste the codes right before the closed tag '}'

display: none;

#5 change size of main (post) wrapper
-find "#outer-wrapper {"
-change "width:800px;"
-find "#main-wrapper {"
-change "width:550;"

#6 change size of sidebar
-find "#sidebar-wrapper {"
-change "width:200px;"

#7 insert image for divider
-find ".sidebar .widget {"
-copy & paste the codes right after "margin:0 0 1.5em;"

background-image: url(http://www.);
background-position: bottom;
background-repeat: no-repeat;

-change the padding to: "padding:0 0 50px;"

#8 change the border-dotted line under post
-find ".post {"
-delete "border-bottom: 1px dotted \$bordercolor;"
-may replace it with new image
-copy & paste the codes on the deleted verse

background-image: url(http://www.);
background-position: bottom;
background-repeat: no-repeat;

-change padding-bottom to 50px

#9 change icon

-go to "<head>"

-copy & paste the codes right after "<title>"

*make sure your icon is in .ico format & 16x16px size

*you may hit this page to convert it (<http://tools.dynamicdrive.com/favicon/>)

```
<link href='http://www.' rel='shortcut icon' type='image/vnd.microsoft.icon'/>
```

#10 change blockquote

-find "a img {"

-copy & paste the codes right after the closed tag '}'

```
blockquote {  
  margin: 0 0 0 30px;  
  padding: 5px 0 0 15px;  
  font-size: 95%;  
  line-height: 1.5em;  
  color: #f52e4f;  
  background: url("http://www.") no-repeat top left;  
}
```

```
blockquote p {
```

```
  margin-top: 0;
```

```
}
```

#11 add footer image

-find "#footer {"

-copy & paste the codes right after "text-align: center;"

```
background: transparent url(http://www.) no-repeat center;
```

-add "height: 130px;" right after the code

#12 move the title description

-find "#header .description {"

-alter "padding: top px right px bottom px left px"

-eg 25px 50px 75px 100px

p/s: play around with the numbers and you'll be delighted ;)
