

## *Three Little Fantasies for Piano*

### ABOUT THE WORK

The Composer, a young Software Professional is passionate about anything related to music. He is exposed to different Indian musical forms since his childhood. He has a private Music Album, 'Music Innate' composed in 2008 to his credit. Music is natural to him. Though he did not receive any formal training in Western Classical Music, his sustained efforts in the past 2 years made him understand the nuances of Western Classical Music. His conception coupled with creativity made this rare feat possible.

This work, I feel is a bold attempt by an Indian in western classical music. The compositions are abundant with western formats intertwined with flowing melodies and sweet themes. Key & mood changes are extensive. Codas are comprehensive.

This Music sounds good and pleasant. The Music grabs the attention of the listener right from the first movement. Personally, third Fantasy is my favourite owing to its intensity and variety.

I wish the Composer Good Luck and all the success in his endeavours in future. I'm sure, with his potential, passion and commitment to Music, he will achieve a lot.
