

**We work hard to protect and  
promote the health of our nation!**

**NOW**

**is the time to act against those who  
stand in our way!**

**Join our march for the  
public option  
and increasing healthcare  
access for all!**

**When: Monday 11/9/2009**

**Time: 4.00pm - Gather at the Philadelphia  
Convention Center, location TBA.**

**What: MARCH TO CIGNA HEADQUARTERS FOR  
THE UNDER- AND UNINSURED CASUALTIES OF  
THE SELF-SERVING INSURANCE INDUSTRY**

# we demand that:

1. CIGNA and all other health insurance companies stop actively lobbying to block the public health insurance option.
2. Congress members follow the will of the majority of Americans and implement health care reform with a robust public health insurance option.
3. Our elected officials spearhead efforts to implement more comprehensive and viable reform, even after the current bill is passed.

## **who we are:**

Public Health Practitioners for Reform is a group started by students at the Harvard School of Public Health. We believe in health care for all and we support the public option as a first step to improving access.

We know that our health care system is broken because we see it in our own work. We believe the current practices of for-profit insurance companies are to blame for many of the problems in our system.

The plans under consideration by Congress are not our ideal, but in this rare and critical moment of possibility, we believe the public option is the most viable avenue for needed reform.
