

Garbo for Colorado

"A Better Tomorrow Begins Today"

March 16, 2010

My Fellow Republicans,

With the aftermath of the 2008 election, people of all walks of life and political affiliations are realizing that the glamour of hope and change is not a sufficient plan for the success or prosperity for our nation or our state. Let me reassure you all that my campaign is not about hope or change; it's about representing You the People and defending the tried and true policies and practices of limited government, individual freedom, and fiscal responsibility.

My name is C. J. Garbo, and I am a third-generation native of Colorado. I love this state, and I love my community, as my background shows. I am a Police Officer, Businessman, Music Minister, Community Volunteer, husband, and man of Christian and family values.

I'd like to address three of our many concerns here tonight:

- 1) **Jobs and Economy** - We need to reduce the tax and regulatory burdens in this state that cause companies like Amazon to pack up shop, move out, and take their revenue with them. It's time that Colorado provides competitive and attractive tax incentives for small businesses. Colorado's economy will only recover if we promote the small business sector and help it flourish. This is limited government.
- 2) **Education** – I believe that parents and local school districts know best how to educate their children and students. Home-schooling and charter schools have proven more effective, whereas “one size fits all” government programs fall short. This is individual freedom.
- 3) **Healthcare** - This is a state issue. Only Coloradans know what's best for Colorado just as Floridians know what's best for Florida. I am here today to tell the Federal Government to back off, and when elected, I am prepared to defend our state's rights as granted under the 10th amendment from this expansive and costly bureaucracy. This is fiscally responsible.

I'm a citizen that sees the direction that Colorado is heading and, like you, I've decided to act for the preservation of limited government, individual freedom, and fiscal responsibility. The good news is this: it's not too late. Let's get to work. Thank you and God bless.
